

Visit to Beech Hill primary School Monday 21st November

The morning was spent in the company of year 3 pupils, initially with Mrs. Lelliot and commenced with a session of Thai- Chi which relaxed and calmed both the pupils and me. This was just as well as the whole of year three were quite excited at the prospect of the imminent visit to the Yorvik Viking centre in York.

Then on to multiplication with the 5 and 10 times tables being recited in almost perfect fashion by the whole class and then a well responded undertaking of "fizz"/"buzz" ensued

Partition multiplication followed by group working of the subject was next and I think it was a good effort from the children despite the activity being quite difficult

After the break time was spent with Miss Jordan and a quest map where dangerous journeys were discussed which was followed by group working where individual island maps were produced and a journey created

The pupils were very well behaved considering their age and well disciplined when necessary by both teachers and from my point of view a very enjoyable and worthwhile morning
